PROFESSIONAL SUMMARIES

Final-year CSE student (CGPA: 9.2) with hands-on GenAI, multi-agent systems, and full-stack experience. Built LangGraph-based agentic applications including CodePilot AI and SilentSOS, and a Crime Scene Detection system using deep learning. Seeking AI/ML internship opportunities.

TECHNICAL SKILLS

Languages and Databases JavaScript, MongoDB, MySQL, C++, Python, PostgreSQL, pgvector

Machine Learning Machine Learning, Deep Learning, NLP, TensorFlow, Scikit-Learn, YOLOv8, Computer Vision, Object Detection, Image Classification, Numpy, Pandas

Generative AI & LLMs Generative AI, LLMs, RAG, Prompt Engineering, Embedding, Hugging Face, LangChain, LangGraph, AI agents, Agent Evaluations, LLM Evaluation

Web & Deployment REST APIs, HTML5, CSS3, Node.js, Express.js, FastAPI, React.js, Tailwind CSS

Tools Git, GitHub, Postman, Visual Studio Code

EXPERIENCE/PROJECTS

AI/ML Intern

Jun '25 — Jul '25

Solitaire Infosys

Mohali, India

- Developed a Crime Scene Detection web application using React.js and Tailwind CSS for image-based analysis.
- Built and integrated a Machine Learning model to detect bloodstains, knives, and firearms from uploaded images.
- Implemented an end-to-end pipeline that processes uploaded images and generates predictions dynamically.
- Integrated the ML model with the web application using REST APIs for seamless frontend–backend communication.
- Technologies Used: Python, Machine Learning, Computer Vision, Flask, REST APIs, React.js
- GitHub: <https://github.com/Pourushkashyap/crime-scene-detection>

AWARDS & ACHIEVEMENTS

Leetcode T-shirt

Solved 1200+ Data Structures and Algorithms problems across LeetCode, GeeksforGeeks, and Coding Ninjas, demonstrating strong problem-solving skills. (https://leetcode.com/u/_pourush2005/)

Best Startup Award, Code Crafter 2.0

Winner – Best Startup Award, Code Crafter 2.0, for developing an innovative technology-driven solution.

LeetCode Coding Competition, CT University (2 times)

Winner – LeetCode Coding Competition, CT University (2 times), showcasing excellence in competitive programming.

EDUCATION

Bachelor of Technology in Computer Science Engineering, CT University (GPA: CGPA: 9.2)

Jul '23 — Present
Ludhiana, Punjab

Class XII, Punjab Agriculture University (GPA: Percent: 92.4)

Jun '23
Ludhiana, Punjab

PROJECTS

SilentSOS - Women's Safety App [Link](#)

Apr '26 — Jun '26

- Built a women's safety app disguised as a calculator that silently monitors audio using a Bidirectional LSTM model to detect distress and danger in real time.
- Implemented NLP and audio feature extraction using librosa (MFCC, pitch, ZCP, energy) and FFmpeg for m4a to WAV conversion before ML inference.
- Designed a full-stack pipeline: React Native (Expo) frontend, Node.js/Express backend, Python Flask ML server, and MongoDB for alert logging.
- Built an automated SOS dispatch system that sends emergency emails with GPS location link and audio recording attached to trusted contact via Nodemailer.

CodePilot AI [Link](#)

Jul '26 — Aug '26

- Built a multi-agent RAG pipeline using LangGraph to analyze codebases and answer natural language queries via agentic retrieval and synthesis.
- Implemented semantic code search with Gemini embeddings and Supabase, optimizing HNSW indexing for scale.
- Designed SHA-256-based chunk IDs to prevent duplicate inserts and a resilient PostgreSQL pooling layer for stability.
- Secured with JWT auth; containerized full stack into a single Docker image for deployment.
- Technologies Used: Python, LangGraph, Gemini, Supabase, pgvector, PostgreSQL, JWT, Docker
